

## MARS 02

### USB Fingerprint Reader

NeuBio MARS 02 is a high quality and ergonomic fingerprint reader. It is designed with the most compact optical sensor on the market, featuring with 500 dpi high resolution and supports ISO-19794-2, ISO-19794-4 and ANSI 378 formats. The MARS 02 USB fingerprint reader is supported by powerful SDK with exceptionally low error rate and quick verification speed which provides you an excellent user experience!

#### Features

- The most compact fingerprint optical sensor on the market
- Scratch free and solid surface
- Patented 500 dpi high resolution fingerprint sensor
- High volume manufacturing design
- SDK features with powerful algorithm to perform the lowest FAR and FRR rate
- Support Windows 7, Windows 8, Windows 8.1 and Windows 10 Systems
- Support ISO-19794-2, ISO-19794-4 and ANSI-378 format

#### Specification

Sensor Type	Optical Sensor
Resolution	500 dpi
Sensing Area	14mm x 18mm
Image Size	252 x 330 ppi
Identification Time	< 1 sec
Enrollment Time	< 1 sec
Verification Time	< 1 sec
Image Format	ISO19794-4; ANSI-378
Template Format	ISO 19794-2; ANSI-378
Matching	1:1 matching
Cable Length	1m micro USB cable
Dimension	L60mm x W70mm x H24 mm
Weight	105g
Certification	CE, FCC, WEEE, RoHS
